PHOTOGRAPHY

PET PHOTOGRAPHY

I love animals and love to catch the soul of pets in a photo.
I am available for indoor and outdoor photoshoots for dogs, cats,
horses or other animal companions!

SERVICES

Your pet at home

I can visit you for a photoshoot in your pet's home surroundings: indoors or in your garden. We will discuss beforehand if there are particular routines, play or details that you want to immortalise in a photo.

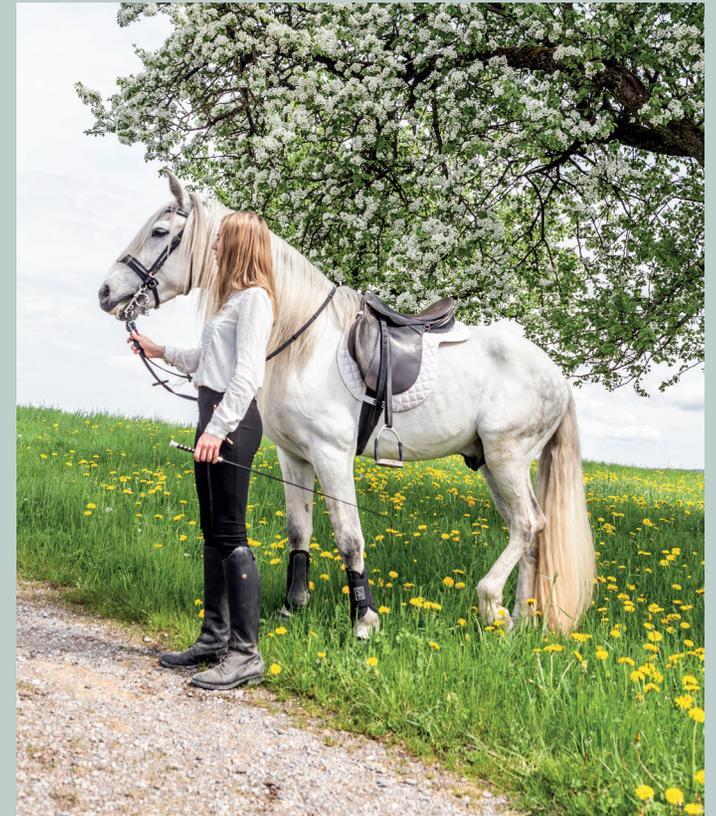

SERVICES

Your pet in nature

I can join you on a walk with your pet and accompany you in the background in a natural, outdoor setting. All your favourite locations are possible: the forest, field, beach or even in the city!

And of course you can be in the pictures too if you wish!

WORKING WITH ME

Get to know your pet

It helps to achieve a more personal approach and create photos showing the true character of your pet if you give me a description of breed and (importantly) personality before the photoshoot. I will take a bit of time before the shoot begins to get to know your pet.

Pet only or with the family?

I can take photos of your pet only or photos that show your pet and the family. Both options are possible too in the same shoot - let's discuss what you would like!

Post-production

All photos can be treated to fit with your personal preferences - be it a more vintage look, black and white or fully colourful. You will receive small-size previews that we can adapt to your favourite style.

PREPARATIONS

Location

Think of all the places you love seeing your pet, be it outdoors or inside. What is your pet's favourite corner to relax? Where is your pet most at ease?

Your pet is shy?

If your pet is very shy towards strangers we can arrange a meeting before the photoshoot date so that I can get to know them better and take away some of the possible fears.

Play time and treats

Prepare your pet's favourite treats and toys for the day of the photoshoot.

Restrictions

If there are any things your pet is afraid of, if it doesn't want to be touched or behaves fearfully in certain situations, let's discuss this first. I prefer to plan shoots during the daytime as flash lights can scare many pets.

Extras

Do you have any special wishes? Let me know and we'll try to arrange that (depending on how cooperative your pet is, of course!) I can capture anything from action-packed fun to cuddle, snuggle time. Your pet's photoshoot should be as personality filled and creative as your pet! You'll be amazed at what is possible.

CAROLINE TRAITLER

I'm a professional photographer established in the music industry as live photographer since I began my career in 2001. As time passed I started working in the tourism industry doing more travel and interior photography and I kept expanding my photo skills as freelancer. My pictures have been featured in high profile magazines and on music album covers.

I offer a wide range of services including photography for weddings, music, events, pets, travels, real estate and hotels.
